

Prefabrication Service

with manufacturer's warranty

Prefabrication service

Prefabricated assemblies offer enormous potential savings and are an indispensable element of modern installation.

We produce clever, customer-specific fastening solutions for building technology and industrial construction. This minimises the assembly work and thus reduces construction time and provides calculation security. Our expansive pre-production depth enables supply of custom, project-specific small series.

Reduced planning time and minimised assembly works are key competitive factors: Prefabricated customer-specific fastening assemblies delivered just-in time to the construction site and ready for installation.

Your advantages at a glance

- Simple quotation processing
- Reduced planning time
- Minimised assembly work
- Shorter construction time
- Efficient relief of technical staff
- Calculation security with fixed end costs
- Guarantee with factory prefabrication
- Just-in-time delivery to the construction site
- Consistent quality
- ♦ No residual material
