

End Support STA 120

Application

In combination with Beam Bracket TKO 120, the End Support enables the construction of crossbars, as well as further conjunctions between building structure and steel construction. By means of oblong holes a simple compensation of structural deviations is possible up to 50 mm.

Scope of delivery

End Support STA 120

Accessories:

4 Hexagon bolts M12 x 40

4 Nuts M12

8 Washers
