

Height Adjuster HRS P

Group: 1339

Application

Suitable for all M&E services. May be fixed directly to the ceiling (anchor) or in a suitable channel. Especially advantageous due to the suspension unit in the upper section of the height adjuster, since it enables the pipes to move in all directions.

Scope of delivery

Pre-assembled component, no loose parts.

Installation

The upper part of the base component can be used as a tool for screwing in the suspending bolt. Then the bolt only has to be tightened with an open-ended spanner. After mounting, the base component rests freely mobile and rotatable on the rounded bolt head. Fixing a locking nut against the cup nut secures the height adjusted.

Technical Data

Material: Base component cast iron, all components galvanised

Max. perm. working load: 4.0 kN

Max. swinging angle: 7°
