

Tension Tie Rod Disc IR

Group: 1334

Application

The Tension Tie Rod Disc IR can be used to fix an installation grid to the building structure. By means of the 3 Threaded Clevis GWB it is possible to create a y-suspension easily. Combined with the Clamping Set SPZ HCP the height adjustment of the installation grid becomes easy.

Technical Data

Max. perm. load per fixing point: 13,6 kN

Material: Steel, galvanised

Type	W [kg]	Quantity [pack]	Part number
IR M10	0.61	8	116602
